**BACKGROUND**

This amendment programs \$113,000 in FY 2001-02 from Los Angeles County's Unprogrammed Share Balance towards a \$634,000 project to provide information through the internet about various construction projects.

This amendment programs \$113,000 in RIP funds for a project to provide information through the web about various construction projects and how they could impact public right-of-way, and pedestrian and traffic movement. The project information will include type of project, project schedule, project manager, and contact person and phone number. This project will provide advance notice for street closure information to the public through the web to improve traffic flow. It will allow advance planning for private and public commuters, thus improving bus and other transit operation.
